Regarding actions of Saga University with the lift of the state of emergency declaration

Although the state of emergency declaration is lifted yesterday, Saga University decided to continue taking the current actions about entering campus, face-to-face classes, research activities and extracurricular activities.

Further notice will be informed if Saga University changes the actions.

As we consider that all the international students have been working hard to prevent infections, please keep refraining from non-essential going out and entering areas where the cluster is likely to occur due to 3C (Closed spaces, Crowded places and Close-contact settings)
