Regarding thorough infection prevention

Dear international students,

A Saga University student tested positive for COVID-19 on July 28\textsuperscript{th}. Please confirm the following and try to avoid the risk of infection.

1. Prevent from going to not only Fukuoka city but also places at high risk of infection such as entertainment district at night and “party” where many people gather.
2. If you have a fever, cold, or other unusual physical conditions, please prevent from going out. If such symptoms continue, contact Health and Welfare office nearby.
3. Thorough basic infection prevention such as wearing a face mask, washing hands, preventing 3C (Closed spaces, Crowded places, and Close-settings)
4. Saga University requests to cancel part-time job activities at entertainment district during the night for the time being.

It is essential for each of us to take action with awareness of infection prevention. Please consult us if you have any problems.
